- Improve thermal performance!
- Eliminate problems!
- Reduce maintenance costs!

Call EVAPCO at **410-756-2600** for the Mr. GoodTower® Service Center near you.

Mr. GoodTower® Ser

EXTEND THE LIFE OF YOUR UNIT

- ✓ Remove corrosion and install the exclusive **EvapLiner** protective membrane coating to all interior sheet metal surfaces.
- ✓ Replace old, corroded, worn panels.
- ✓ Reseal all sheetmetal seams with new caulking to stop leaks.

IMPROVE THERMAL PERFORMANCE

- ✓ Install new and more efficient wet deck and replace coil bundles for better thermal performance.
- ✓ Install new water distribution systems and recirculating pumps to provide better coverage over the wet deck or coils.
- ✓ Install new fan motors, sheaves, and fans to provide more airflow.

Mr. GoodTower® Service Centers will evaluate existing equipment layouts and recommend replacement units.

Service Centers can...

ELIMINATE PROBLEMS

- ✓ Replace old and worn shafts, bearings and wheels **prior** to failure. Emergency replacements can result in expensive repairs and unscheduled equipment down time.
- ✓ Install new winterization equipment such as sump heaters, heat tape and pipe insulation.
- ✓ Install new filtration equipment to reduce fouling in the equipment being serviced by the evaporative cooling equipment.

REDUCE MAINTENANCE COSTS

- ✓ Install jib booms and davits, ladders and platforms to reduce labor hours by providing easier access to high maintenance areas of the evaporative cooling unit.
- ✓ Install electric water level controls to eliminate the expense associated with leaking mechanical make-up valves.
- ✓ Provide a service contract to perform all the routine maintenance as recommended by the evaporative cooling equipment manufacturer

**Mr. GoodTower® Service Centers stock parts
for emergency repairs!**

Mr. GoodTower® Service Center Personnel are...
